from the moment i walked in, i knew i was going to have a great experience
marketing atypical antipsychotic drugs for use in treating dementia is banned, since the drugs aren't approved for such use
we chose brain cancer because of its difficulty in treatment and its unique receptors, said scientist elena rozhkova with the doe's argonne national laboratory.
depending on the person and how he became addicted to prescription medications, abuse of the drug may have been easily justified for a long period of time
but these people are usually high or crazy or both
